

I respectfully request that you take no steps to limit the ability of XM Radio to provide me with quality, variety programming. As a paying user of this service, I enjoy and depend on the many formats available including music, drama, discussion, weather and traffic information. The weather and traffic are particularly important to me as I travel in my motor home. The quality of most local programming has deteriorated to a constant barrage of crude music and of seemingly endless commercials that I do not have to endure on XM. In addition, the XM goes with me as I travel since I do not run out of an area of coverage. Local radio has its place, but it should not infringe on the rights of the XM service to provide a quality, subscriber paid service.
